

AI and the Administrative State:

Pulling Back the Curtain on the Use of AI in Mass Adjudications and Agency Decision-Making

AALS Clinical Conference, Baltimore, April 29, 2025

UBALT
100

1925  2025

Jessica Wherry, UBalt

Morgan Maclsaac-Bykowski, Stetson

Yelena Duterte, UIC

James Ridgway, GWU

Hugh McClean, UBalt

Panelists

- Jessica Wherry, University of Baltimore
- Morgan Maclsaac-Bykowski, Stetson
- Yelena Duterte, University of Illinois Chicago
- Hugh McClean, University of Baltimore
- James Ridgway, GWU, Bergmann & Moore

Overview:

- Understanding AI in Adjudications
- Overview of Federal Guidance for Agencies
- How VA is Using AI in Adjudications
- Small Group Discussion – Impact of AI on Teaching and Representation

Understanding AI in Adjudication

UBALT 100

THE UNIVERSITY OF BALTIMORE

Computers in Adjudication

- Computers have been used in adjudication for decades.
- Adjudication is fundamentally information processing.
- Deciding cases is about gathering information and applying a set of rules to that information.

Automation vs. AI

- “Artificial intelligence” is qualitatively different than automation.
- Think rules vs. standards.
- Automation is using a computer to process rules.
 - Does the veteran have wartime service?
 - Apply the dates of service to the legal definitions of when wars began and ended.

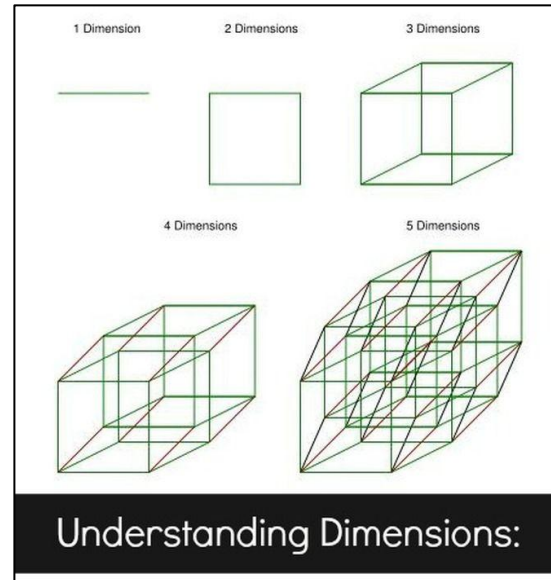

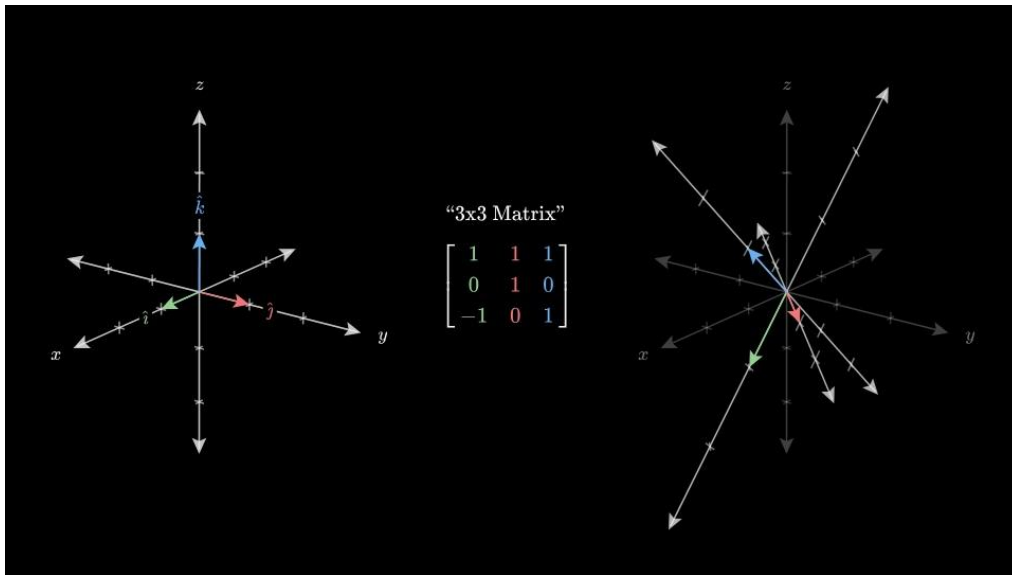

AI and Fuzziness

- Artificial Intelligence covers many things but generally **involves** actions that traditionally require **subjective judgment rather than** the mere application of **objective rules**.
- Beneath the hood, AI is using unimaginably complex matrix algebra to generate and find **statistical associations** between huge amounts of information to guess at an output that best **approximates** the **desired output** based upon examples and defined target criteria.
- Chatbots are guessing—usually word by word—what output to provide based upon the analysis of billions or trillions of examples.

Machine Learning Mathematics

- Models are created by training on existing data to assign spatial coordinates to different values (like words).
- New data is analyzed using the values developed for the model to make predictions based upon proximity.

- **CHAT GPT 3 WAS BASED UPON A SPACE WITH 12,228 DIMENSIONS.**

AI Examples

- After sufficient training on an appropriate data set, AI can:
 - **Search** a large body of information, locate relevant content, and provide a summary
 - This replaces human review of evidence.
 - **Analyze images** and provide an interpretation of what they represent.
 - This replaces human interpretation of handwriting and photographs.
 - **Generate a decision** based upon an analysis of evidence.
 - This replaces human analysis of evidence and application of judgment based upon fuzzy standards.
 - **Review decisions** drafted by humans and identify passages that have patterns indicative of analytical errors.
 - This replaces human quality review.

Overview of Federal Guidance for Agencies

UBALT 100

THE UNIVERSITY OF BALTIMORE

AI Defined by Statute

In August of 2018, the National Defense Authorization Act provides Congress' first definition of AI.

ARTIFICIAL INTELLIGENCE DEFINED.

- (1) Any artificial system that performs tasks under varying and unpredictable circumstances without significant human oversight, or that can learn from experience and improve performance when exposed to data sets.
- (2) An artificial system developed in computer software, physical hardware, or other context that solves tasks requiring human-like perception, cognition, planning, learning, communication, or physical action.
- (3) An artificial system designed to think or act like a human, including cognitive architectures and neural networks.
- (4) A set of techniques, including machine learning, that is designed to approximate a cognitive task.
- (5) An artificial system designed to act rationally, including an intelligent software agent or embodied robot that achieves goals using perception, planning, reasoning, learning, communicating, decision making, and acting.

JOHN S. MCCAIN NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2019 (codified at 10 U.S.C. § 2358)

Congress Encourages Agencies To Use AI

Under this same statute, Congress directed agencies to use AI in order to advance performance and maximize data.

§9462. Veteran's health initiative

(a) Purposes. The purposes of this section are to **advance Department of Energy expertise in artificial intelligence** and high-performance computing in order to improve health outcomes for veteran populations by—

(2) **maximizing the impact of the Department of Veterans Affairs'** health and genomics data housed at the National Laboratories, as well as data from other sources, on science, innovation, and health care outcomes **through the use and advancement of artificial intelligence** and high-performance computing capabilities of the Department;

NATIONAL ARTIFICIAL INTELLIGENCE INITIATIVE – 15 U.S.C. § 9401 (January 1, 2021)

Congress Outlines the Role of AI

Congress directed the Executive Branch to give agencies some guidance regarding their use of AI.

AI in Government Act of 2020

- Aimed to ensure the use of AI in the federal government was effective, ethical, and accountable
- Created the AI Center of Excellence within the General Services Administration (GSA)
- **Required the Office of Management and Budget (OMB) to issue a memorandum to federal agencies regarding:**
 - the development of AI policies;
 - approaches for removing barriers to using AI technologies;
 - and best practices for identifying, assessing, and mitigating any discriminatory impact or bias and any unintended consequences of using AI.

Pub. L. No. 116-260, div. U, title 1, § 104 (codified at 40 U.S.C. § 11301 note)

Congress Encourages Agencies To Use AI

Congress encouraged agency use of AI to “enhance the competitiveness of the United States” and “build on the strengths of the United States in innovation and entrepreneurialism.”

Advancing American AI Act

- Congress required the Secretary of Homeland Security to create an approval process for the procurement and use of AI systems.
- Congress also required the Director of the OMB to
 - develop privacy and national security measures and guidance for agencies
 - require that agencies disclose any current or planned future use of AI
 - ensure the creation and maintenance of an online public directory in order to make agency AI use information available to the public

Pub. L. No. 117-263, div. G, title LXXII, subtitle B, §§ 7224(a), 7224(d)(1)(B), and 7225 (codified at 40 U.S.C. 11301 note)

OMB Sends Agencies a Memorandum

As directed to by the AI in Government Act of 2020 and the Advancing American AI Act, OMB sent a memorandum to agencies.

March 28, 2024 OMB Memo M-24-10

- “establishes new agency requirements and guidance for AI governance, innovation, and risk management, including through specific minimum risk management practices for uses of AI that impact the rights and safety of the public.”
- required agencies to compile an active inventory of how they are using AI, as well as identify, review, and meet risk management requirements for AI use cases deployed in sensitive contexts—designated as “safety and/or rights impacting” use cases.

Biden and Trump Issued Executive Orders

- **EO 13859 – MAINTAINING AMERICAN LEADERSHIP IN ARTIFICIAL INTELLIGENCE** (Feb 11, 2019) – Trump
- **EO 13960 – PROMOTING THE USE OF TRUSTWORTHY ARTIFICIAL INTELLIGENCE IN THE FEDERAL GOVERNMENT** (December 3, 2020) – Trump
- **EO 14110 – SAFE, SECURE, AND TRUSTWORTHY DEVELOPMENT AND USE OF ARTIFICIAL INTELLIGENCE** (October 30, 2023) – Biden (Revoked by Trump through EO 14179)
- **EO 14179 – REMOVING BARRIERS TO AMERICAN LEADERSHIP IN ARTIFICIAL INTELLIGENCE** (January 23, 2025) - Trump

VA's Use of AI

Ways we have seen VA use AI:

- **Veterans Benefits Administration**

- Determine when a medical exam or medical opinion is required
- Review claims files, military personnel files, and service treatment records
- Track claim processing
- Detect fraudulent direct deposit requests
- Automate workflow

- **Veterans Health Administration**

- Assist with providing clinical diagnoses, treatment plans
- Conducting drug-addiction and suicide risk assessments
- Automate workflow in benefits claims processing

VA's Use of AI

VA Artificial Intelligence Vision Statement

The Department of Veterans Affairs (VA) artificial intelligence (AI) vision is to improve outcomes and experiences for our Veterans by developing trustworthy AI capabilities in support of the agency's mission.

Mission Statement

The Department of Veterans Affairs will build robust capabilities in AI to develop and apply innovative AI solutions and transform the VA by facilitating a learning environment that supports the delivery of world-class benefits and services to our Veterans.

Use Case ID	Use Case Name	Agency	Bureau	Use Case Topic Area	Other (Use Case Topic Area)	Is the AI use case found in the below list of general commercial AI products and services?	What is the intended purpose and expected benefits of the AI?	Describe the AI system's output	Stage of Development	Is the AI use case rights-impacting, safety-impacting, both, or neither?
6 VA-36	Evolve VDS - OSSD	VA	VHA, Veterans Health Law & Justice			Creating visual representations of data sets for reports and presentations using	Using heat map technology to identify heat spots Areas of interest for a heat map that include	Operation and Maintenance	Both	
6 VA-42	VA Chat Copilot Meta Pilot	VA	OIT, Office of Informa Mission-Enabling (Internal agency support)			Improving the quality of written communications using AI tools.	Administrative efficiency for VA employees Chat Copilot is a generative AI interface that	Acquisition and/or Development	Neither	
7 VA-77	Avigilon Camera Research Function - OSSD	VA	VHA, Veterans Health Law & Justice			Searching for information using AI	A search function in a security video surveillance Video or picture of requested searches from	Operation and Maintenance	Both	
8 VA-63	CareVista Next Level Personalized AI Health Coach	VA	VHA, Veterans Health Health & Medical			None of the Above	This is an evidence-based, randomized control trial AI solution that focuses on precision	Implementation and Assessm	Neither	
9 VA-18	SafePointe VDS - OSSD	VA	VHA, Veterans Health Law & Justice			Creating visual representations of data sets for reports and presentations using	Heat map detection for weapon detection sc. Areas of interest for a heat map that include	Planned	Both	
10 VA-107	GE Volexity	VA	VHA, Veterans Health Health & Medical			Creating visual representations of data sets for reports and presentations using	Volexity leverages AI to automatically segment Provide patient dosimetry calculations.	Operation and Maintenance	Both	
12 VA-99	Verkada Camera - OSSD	VA	OIT, Office of Informa Mission-Enabling (Internal agency support)			Searching for information using AI	Transcribing and summarizing a recorded meeting or interview using AI	Acquisition and/or Development	Neither	
13 VA-93	MPI - GE Signa Artis	VA	VHA, Veterans Health Health & Medical			Creating visual representations of data sets for reports and presentations using	AI/ML Recon DL is a deep-learning-based MRI image reconstruction.	Operation and Maintenance	Both	
14 VA-71	Google Cloud Platform - CCAI / Dialogflow	VA	OIT, Office of Informa Government Services (Includes Benefits and Services)			None of the Above	To allow for better self service options to vet the output of GCP voice chat is test to spec	Acquisition and/or Development	Neither

How VA is Using AI in Adjudication

UBALT 100

THE UNIVERSITY OF BALTIMORE

VA Programs

- Veterans Benefits Management System (VBMS)
 - VBMS Core – An electronic claims file where documents are stored
 - VBMS R – A suite of tools to help staff gather evidence and make decisions.
- Office of Automated Benefits Delivery
 - Has been moving beyond automation to using AI in building tools.
 - New chatbot generates answers to questions from rating staff.

VBMS 2.0 File Review

- Within a day of a claim being filed, AI will review the claim file and:
 - (1) decides what benefit is being sought and what theory of entitlement claimed (if applicable)
 - (2) automatically retrieve records from the military and VA hospitals
 - AI scrubs VA records of entries deemed duplicative.
 - (3) create and Automated Review Summary Document (ARSD)
 - This is a PDF summary of the file.

Automated Review Summary Documents

- Here is a sample of a Veteran's ARSD.
- The top of the screen contains basic info about a Veteran.
- The middle tells you exactly what happened with the automation.
- The bottom shows a table of contents.

U.S. Department
of Veterans Affairs

EVIDENCE REVIEW SUMMARY

Veteran's Name:	
File Number:	
Date of Evidence Review:	11/22/2024
Claim ID	
Date Of Claim	11/21/2024
ITF	N/A
EP	020

Claims Processors: This document summarizes data in the Veteran's record related to military service and disability evaluation criteria.

ARSD Contention Outcomes			
CONTENTION CLAIMED	CONDITION	PROCESSING TYPE	AUTOMATION OUTCOME
LOWER BACK PAIN SECONDARY TO COSTOCHONDRITIS UPPER BACK PAIN SECONDARY TO COSTOCHONDRITIS	Spine Condition (Back)	Secondary	ARSD Generated
Outcome Reasoning: ADS currently only summarizes relevant medical evidence for Secondary claims. Claims processor review required			

Contentions Not Processed by ADS	
CONTENTION CLAIMED	INELIGIBILITY REASON
SCOLIOSIS SECONDARY TO COSTOCHONDRITIS	ADS does not currently automate this condition.

Claim Outcome	
CLAIM OUTCOME	OUTCOME REASON
OPEN	This Claim has been placed in Open Status for further review by the Claims Processor. The Automation System has identified relevant schedular evidence that requires review on the Automated Review Summary Document.

v4.18.0
1 of 8

Automated Review Summary Documents

Condition: Spine Condition (Back)

Processing Type: Secondary

Automation Outcome: ARSD Generated

Schedule for Rating Disabilities for Spine Condition (Back): <https://www.ecfr.gov/current/title-38/chapter-I/part-4/subpart-B/subject-group-ECFRd3005f7d828ea7b/section-4.71a>

Diagnosis for Spine Condition (Back)

NAME	ICD CODE	DATE	DOCUMENT	PAGE NUMBER(S) / EVENT ID(S)	DOCUMENT ID
None of the ICD codes associated with this condition were identified in the VA Healthcare records reviewed by automation					

DBQ for Spine Condition (Back)

TYPE OF DBQ	VBMS RECEIPT DATE	DOCUMENT	PAGE NUMBER(S) / EVENT ID(S)	DOCUMENT ID
Automation did not identify any DBQs for this condition within the records reviewed.				

Schedular Evidence for Spine Condition (Back) Within the Review Period

EVIDENCE	OBSERVATION DATE	DOCUMENT	PAGE NUMBER(S) / EVENT ID(S)	DOCUMENT ID
Scoliosis	11/21/2024	VA 21-526EZ, Fully Developed Claim (Compensation)	3	b0c7f35c-a208-4b66-9168-d321dbc33246

- The main document is divided into sections that identify (1) medical diagnoses, (2) DBQs, (3) “schedular evidence,” and (4) other evidence.

Evidence Summaries

No Pain With Oxtension) Active Thoracic Oxtension Active Thorado Axtenalon Activo Thoracio Extension	9/17/2013	JLV/MTF	291	ed8542e9-7d50-41fb-9dc6-55a20f4d8776
Srrr	7/25/2013	Medical Treatment Record - Government Facility	7	511368f2-e2c4-45d3-be91-6de978a5244f
Srrr	7/25/2013	JLV/MTF	329	ed8542e9-7d50-41fb-9dc6-55a20f4d8776
Weakness	5/2/2012	JLV/MTF	755	ed8542e9-7d50-41fb-9dc6-55a20f4d8776
No Soft Tissue Swelling	5/1/2012	JLV/MTF	761	ed8542e9-7d50-41fb-9dc6-55a20f4d8776

- One of the terms in the medical records that AI thinks may be relevant to rating the severity of this condition is “Srrr.”
- Note that the summary provides dates for all the records, but the AI needs only 80% confidence in the accuracy of that date to display it without any notation that it could be wrong.

VBMS 2.0 Outcomes

- Automated review can lead to one of five states:
 - (1) Stop after ARSD.
 - (2) Designate a case for drafting an order for a medical opinion.
 - (3) Draft a recommended order for a medical exam.
 - (4) Designate a case as ready for decision.
 - (5) Draft a recommended decision for approval.

Some Top Concerns

- Automation favors agency evidence that contains structured data.
- AI misunderstands pro se submissions that use legal terms inaccurately or imprecisely.
- AI summaries miss evidence that does not conform to expected patterns.
- AI summaries provide dates for evidence as definitive even when only 80% confident that the date is accurate.
- Links to relevant law in evidence summary may not reflect law applicable when claim was decided.
- AI misidentifies records in duplication analysis (in both ways).
- AI Chatbot may hallucinate laws and policies without transparency.

SMALL GROUP DISCUSSION

(but first, check-in questions)

DISCUSSION QUESTIONS

- How does the audience (AI) and broader rhetorical situation change?
- How should clinicians account for these changes in assessment and teaching?

Summary:

- Understanding how AI is used in agency decision-making
- Overview of Federal Regulations
- Impact of AI on teaching and representation

Thank you!
